I'm a self-taught software developer with a primary focus on client-side applications. Be it native mobile apps or web apps I have worked on both. My journey started 6 years ago with iOS development that helped me master the client-side and today I can proudly say that I have worked on all 3 big platforms: iOS, Android, and the Web.

PROFESSIONAL EXPERIENCE

Flowplayer, Stockholm Sweden — 2021 – *Present*

iOS SDK & React Front-end Developer

- Hired to refactor a monolithic iOS SDK that was built as an AVPlayer wrapper
- Was the sole developer that fixed and developed the Flowplayer iOS SDK
- Modularized Flowplayer SDK and re-wrote it with Swift Package Manager
- Supported the development of Flowplayer OVP UI Platform.
- Refactored the entire bundling and bootstrapping of Flowplayer OVP UI Platform.
- Worked on development of Flowplayer React Player package.

Calo Partners, Sarajevo Bosnia & Herzegovina — 2019 – 2021

Android Team Lead & React Front-end Developer

- Developed a Call Agent Platform from the ground up (Bluemoon).
- Lead the development of the unreleased Android home launcher (JustLauncher).
- Helped with technical advising and consulting of smaller startups that we worked with.
- Appointed as the team lead in one of the startups under our supervision.
- Worked directly with the CEO on all the projects mentioned above.

PERSONAL PROJECTS

Zush-ups: Exercise System — 2017 – *Present*

iOS Fitness App

- Created the app as a learning project and kept working on it.
- App is a fully native iOS app that is oriented around a single purpose to count push-ups.
- Accumulated over 10k users as of writing.
